theLeda B
LED spotlight

LUNA top3
twilight switch

RAMSES 814 BLE UP
clock thermostat

Now with even more options Thanks to additional modules

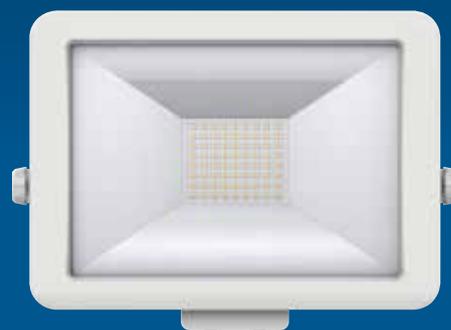

The incredibly flat LED spotlight with driverless, high-power LED technology is available as a single unit or combined with a light sensor, motion sensor or a remote-controlled motion sensor. Ideal for use on business premises in areas such as loading bays and ramps or entrances. The modular design leaves you free to configure your own theLeda B LED spotlight to suit your specific requirements.

theLeda B20L WH
20 W

theLeda B30L BK
30 W

theLeda B50L WH
50 W

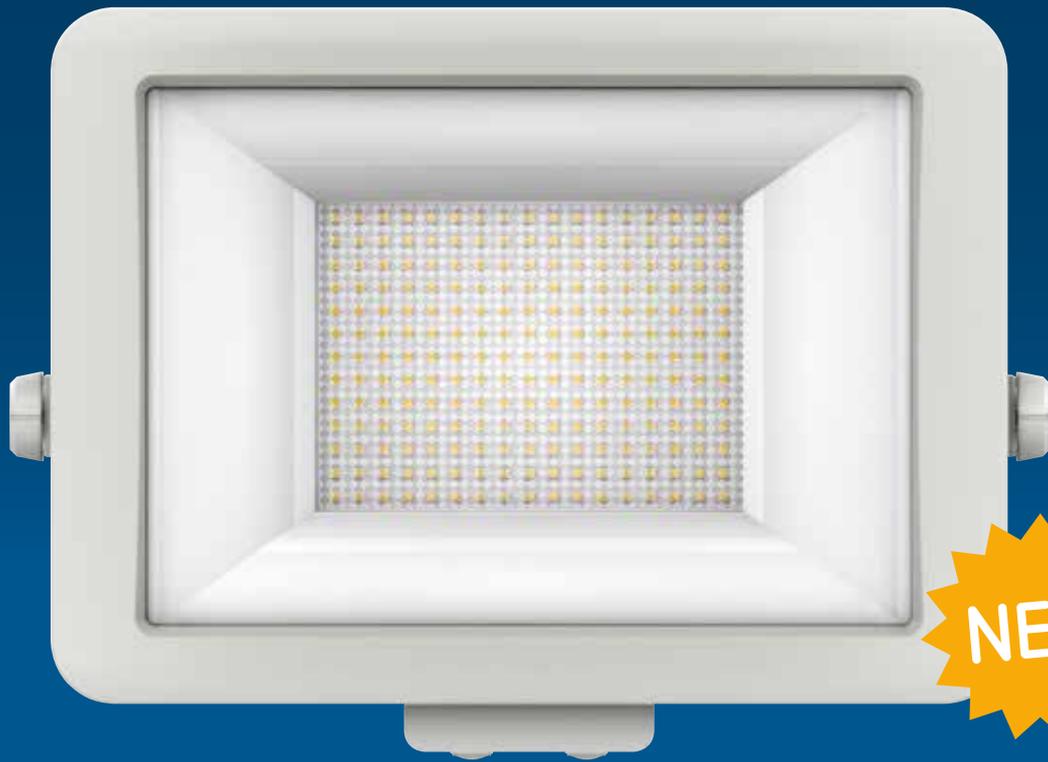

Always a perfect fit: Thanks to the modular design

Looking for a high-quality and high-performance LED spotlight?
Or perhaps an LED spotlight in conjunction with a motion detector?
Ideally with a remote-controlled motion detector?
Alternatively, you can use a light sensor to control lighting based on when it goes dark at night. Whatever you want, the modular system for theLeda B makes it possible. Easy to install. Even easier to adjust to your needs!

The robust, powder-coated housing, high-quality polycarbonate lens and protection class IP 65 ensure reliable operation outdoors.

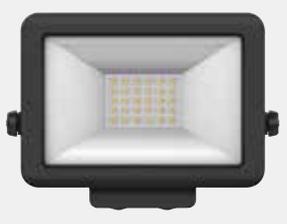

theLeda B LED spotlights now come in four models ranging from 20 W (1500 lm) to 100 W (10,200 lm) at a colour temperature of 5000 kelvin. The prismatic reflector ensures optimum light distribution.

Find out more on page 8.

100 W

The accessories: Clever additions

 <p>Version 1: LED spotlight For lighting control via a switch or a button</p>	 <p>Version 2: LED spotlight with light sensor For daylight-based lighting control</p>
 <p>Version 3: LED spotlight with motion detector For motion-based lighting control</p>	 <p>Version 4: LED spotlight with RC motion detector For motion-based lighting control Each RC motion detector is sup- plied with a remote control</p>

Well organised management

Here you can create new programmes, or name and manage projects.

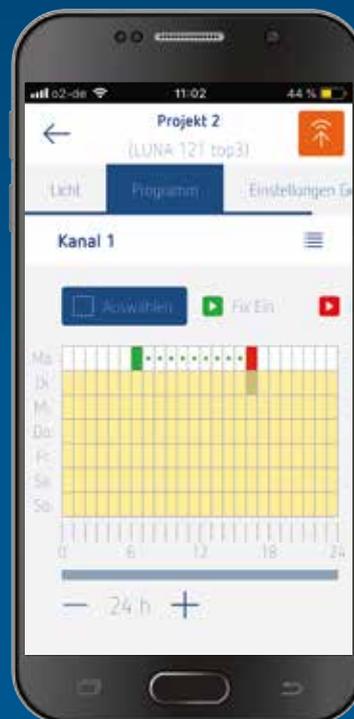

Convenient settings

Select the precise brightness values you require for turning the twilight switch on the Lux on and off for every day of the week.

Secure connection

Activate your top3 device for transfer and send the programme via Bluetooth. Make sure the Bluetooth OBELISK top3 is inserted.

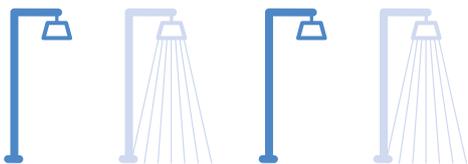

Intuitively created

An individual time programme is quickly and clearly created in the classic list view.

LUNA top3 – daylight-based adjustments Now possible via a smartphone app

The new LUNA top3 digital twilight switches from Theben are reaching new heights in terms of functionality, programmability and energy efficiency: Twilight programmes can be easily controlled using an app and transferred to the twilight switch via Bluetooth Low Energy. Thanks to the redesigned zero-cross switching, you can keep the high inrush currents of LEDs firmly under control. top3 provides 5 times more LED output than top2 (max. 600 W/800 A/200 µs).

Practical, reliable and low-maintenance: Channel switching and locking

The new dual-channel LUNA 122 top3 twilight switch now offers a channel-switching and locking feature. The channel switching option allows you to activate basic lighting while at the same time saving energy. For example, this can ensure even loads for street lighting elements, while reducing maintenance intervals and downtimes. The channel locking feature prevents a channel from using conflicting commands which could damage connected devices (e.g. forward and return for motors).

Find out more on page 10.

Special programmes with yearly functions

The new LUNA 121 top3 and LUNA 122 top3 twilight switches feature a small annual programme and make it possible to programme one-off and recurring events (e.g. pre-programmed holidays which you need only select).

Maximum security against tampering

Time switch programmes can only be transferred from the app to the timer if the Bluetooth OBELISK top3 is plugged into the timer. This protects your device against unwanted access by third parties and ensures maximum security against tampering. This is particularly important for devices installed in public places.

RAMSES 814 BLE UP

Conveniently controlled from your smartphone

The new RAMSES 814 BLE UP clock thermostat by Theben is the first invisible clock thermostat (heating or cooling). It is completely hidden in the flush-mounted socket, under the blind cover or the socket cover.

This clock thermostat can be controlled and programmed via app, is easy to operate and can be quickly adapted to different user prompts. A direct Bluetooth Low Energy (BLE) connection is established between the app and RAMSES 814 BLE UP. This scores points with minimum power consumption for accurate temperature measurement and control. No additional components are necessary, making it attractively priced.

The invisible clock thermostat

An absolute must

Easy to use

Fiddly buttons and a basic operating display are a thing of the past. RAMSES 814 BLE UP is conveniently operated using smartphones and tablets with a high-definition colour touch screen.

Maximum security against tampering

RAMSES 814 BLE UP only needs a local Bluetooth connection to work in your home. There is no need for an Internet connection or any additional gateways or routers. A clear advantage in terms of security against tampering.

Easy to Install

In contrast with other smart thermostats, the RAMSES 814 BLE UP does not need any additional components (gateways, switch actuators, etc.). Install the RAMSES 814 BLE UP just like a conventional clock thermostat: quickly, easily and stress free.

Highlights

- Adjustable heating or cooling
- 3 freely programmable weekly programmes P1, P2, P3 (temperature level, times)
- Setting options:
 - Permanent comfort, set-back operation and frost protection mode
- Party and Eco function
- Holiday programme
- Wall comparison to adjust the room temperature measurement
- Programmable optimiser to achieve the target room temperature at time switch
- Optional external input for floor sensors, room temperature sensors, window contact and presence detectors
- Small sensor unit for recording the temperature (photo on left)

New products spring 2019

theLeda B LED spotlight

Description

Common functions

- LED spotlights
- Suitable for outdoor use
- Flexible extension options thanks to optional module with motion detector including switch output or light sensor incl. switch output
- Spotlight can be rotated 360°
- Not dimmable

theLeda B20L

- 20 W LED spotlight

theLeda B30L

- 30 W LED spotlight

theLeda B50L

- 50 W LED spotlight

theLeda B100L

- 100 W LED spotlight

theLeda B motion detector RC module

- theLeda B radio-controlled motion detector module
- 180° detection angle at 12 m range
- Additional light switch output
- Sensor can be turned horizontally by $\pm 90^\circ$ and downwards/backwards by 90°
- IP 55 protection rating
- theLeda B remote control included in scope of supply for the motion detector module
- A remote control can be combined with different motion detector modules
- Up to 6 remote controls can be combined with a single motion detector module
- Remote control range up to 50 m

theLeda B motion detector module

- Motion detector module for theLeda B
- 180° detection angle at 12 m range
- Additional light switch output
- Sensor can be turned horizontally by $\pm 90^\circ$ and downwards/backwards by 90°
- IP 55 protection rating

theLeda B light sensor module

- Light sensor module for theLeda B
- Duty cycle range: 2, 4, 6, 8 hours, on/permanent on at night
- Switch-on brightness can be set from 2–200 lux
- Additional light switch output
- IP 55 protection rating

LUNA 111/112 top3 twilight switch

LUNA 111 top3

LUNA 112 top3

Description

Common functions

- Dimmer switch/light controller
- External light sensor included in the scope of supply
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy with OBELISK top3
- Maximum security against tampering, time switch programmes can only be transferred from the app to the timer if the Bluetooth OBELISK top3 is plugged in
- Switching brightness digitally adjustable
- Adjustable on and off switching delay
- Switching brightness and switching delay can be set separately for switching on and off

- Onscreen display of channel and switching status as well as current lux value
- DuoFix load line connections
- Zero-cross switching for relay-saving switching and high lamp loads
- Up to 4 sensors can be attached
- Up to 10 devices can be connected to a digital sensor
- Interface for OBELISK top2 memory card (PC programming)
- Extended brightness range
- Permanent ON/OFF switching
- Test function
- Switching pre-selection
- Display lighting
- PIN coding
- Hour counter

- LUNA 111 top3
- 1 channel
- External input
- LUNA 112 top3
- 2 channels

LUNA 121/122 top3 RC twilight switch

LUNA 121 top3

LUNA 122 top3

Description

Common functions

- Dimmer switch/light controller with integrated time switch with weekly programme
- External light sensor included in the scope of supply
- Time synchronisation option via connection of an external antenna, e.g. top2/3 RC-DCF or top2/3 GPS antennas
- 3 special programmes (small annual programme)
- Pulse programme
- 84 memory locations
- Programming by app possible
- Safe transfer via optional Bluetooth Low Energy with OBELISK top3
- Maximum security against tampering, time switch programmes can only be transferred from the app to the timer if the Bluetooth OBELISK top3 is plugged in
- Switching brightness digitally adjustable
- Adjustable on and off switching delay

- Switching brightness and switching delay can be set separately for switching on and off
- Onscreen display of channel and switching status as well as current lux value
- DuoFix load line connections
- Zero-cross switching for relay-saving switching and high lamp loads

RAMSES 814 BLE UP clock thermostat

Description

- Digital clock thermostat for time-dependent monitoring and control of room temperature (heating or cooling)
- Mains version
- Operation via app
- Suitable for energy-saving room temperature regulation in houses, apartments, etc.
- Installation in flush-mounted box, can be used with any switching programme or under a blind cover
- Temperature sensor in scope of supply
- Direct Bluetooth Low Energy (BLE) connection between the app and RAMSES BLE, no communication via the Internet
- Settings configured conveniently via the app with intuitive operation from a smartphone or tablet
- Increased user convenience
- External input for the flexible connection of the external room temperature sensor, floor sensor, motion detector or telephone contact
- Intelligent control algorithm (pulse-duration controller, hysteresis controller)
- Suitable for on/off heating systems, zone-based or single-room control, electric heating units

Simple operation via app

- Intuitive programming without the need for prior experience and device monitoring on a high-resolution smartphone display
- Maximum protection against tampering and optimum data protection thanks to the local Bluetooth Low Energy connection. No Internet connection with cloud data storage, remote access and geofencing
